I. Problem Definition

Web movie management software is a software that specializes in providing feature films from many leading domestic and international film producers, with a variety of interesting movies and movies. With a team of professional programmers from the BNT Group that has a lot of experience. Our films are full of information such as movie name, production year, director, actor, country. Today, the technology age of 4.0 is the time when we can watch movies at home without having to go to the theater to see, our company wants to set up a movie web management application to watch movie and manage (for administrators) online. The requirement is to build a website to watch online movies that manage movies, viewers, money loaded into accounts, advertise, download movies, download movies, etc.

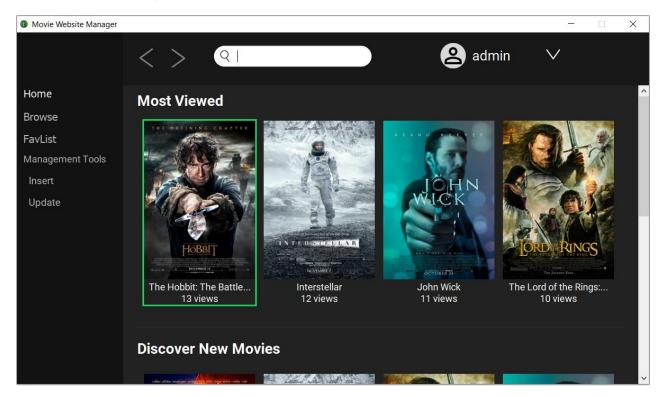

FIGURE 1 OUR MOVIE WEBSITE MANAGER APPLICATION

II. User Requirements

1. Functions

Functions in our program varies depending on the security level of user account.

Normal users (level 0) will only have basic functions like:

- Create their own account
- Update their's user profile
- Browse, Search for movies
- Create/Update favorite list

Moderators (level 1) will have additional functions:

Create/Update Movies, Directors, Actors, Studio, Country

Administrators (level 2) can access to all functions of others level and plus these functions:

- Create accounts for other users
- Can access/update all information of non-admin account (except account's password)

2. System Requirements

Hardware Requirement (minimum)	Hardware Requirement (recommended)
+ CPU: Intel Pentium 2 266 MHz	+ CPU: Intel Core i9 9900K 3.6 GHz
+ RAM: 128 MB	+ RAM: 16 GB
+ Storage: 128 MB of free disk space	+ Storage: 256 GB of free disk space

Software Requirement

- + Window XP or higher
- + JRE 1.7 or higher
- + VLC media player version 3.0.0 or higher

III. Roles

Role	Member	Responsibilities
Leader ThanhKH		Creating Schedule and Check List, Assigning assignment to team members
Secretary	NhanDT	Taking note
Analyst & Design ThanhKH, NhanDT, BangNT		Table of content, Problem Defining, User Requirement. Interface Designing
Coder ThanhKH, NhanDT, BangNT		Programing all functions for applications
Tester	NhanDT, ThanhKH	Testing all functions
Maintenance NhanDT, BangNT		Checking and backup data

IV. Schedule

No.	Assignment	Member	Start Time	ETF¹ (hrs)	Deadline
1	Problem Definition	ThanhKH, NhanDT	28/06/2019	2	23h50 28/06/2019
2	User Requirement and System Requirement	BangNT	28/06/2019	4	23h50 28/06/2019
3	Analysis	ThanhKH	08/07/2019	12	23h50 08/07/2019

V. Design Pattern

1. Database Structure

2. Table Structure

	Account				
Fleld Name	Data Type	Contraint	Description		
acc_id	int	PRIMARY KEY	ID of Account		
acc_username	nvarchar (30)	NOT NULL	Username of Account		
acc_password	nvarchar (20)	NOT NULL	Password of Account		
acc_level	int	NOT NULL	Security level of Account		
acc_status	int	NOT NULL	Status of Account		

		Client	
Fleld Name	Data Type	Contraint	Description
c_id	int	PRIMARY KEY	ID of Client
c_name	nvarchar (20)	NOT NULL	Name of Client
c_email	navrchar (30)	NOT NULL	Email of Client
c_gender	int	NOT NULL	Gender of Client
acc_id	Int	FOREIGN KEY	ID of Client's Account

		Movie	
Fleld Name	Data Type	Contraint	Description
m_id	int	PRIMARY KEY	ID of Movie
m_name	nvarchar (40)	NOT NULL	Name of Movie
m_year	int	NOT NULL	Year of Movie
m_views	double	NOT NULL	Views of Movie
m_duration	int	NOT NULL	Duration of Movie
m_description	nvarchar (300)	NOT NULL	Summary about Movie
m_trailer	nvarchar (40)	NOT NULL	Path to Trailer of Movie
m_thumbnail	nvarchar (40)	NOT NULL	Path to Thumbnail of Movie
s_id	int	FOREIGN KEY	Id of Studio
country_id	int	FOREIGN KEY	Id of Country

	Studio					
Fleld Name	Data Type	Contraint	Description			
s_id	int	PRIMARY KEY	ID of Studio			
s_name	nvarchar (20)	NOT NULL	Name of Studio			

Actor					
Fleld Name	Data Type	Contraint	Description		
a_id	int	PRIMARY KEY	ID of Actor		
a_name	nvarchar (20)	NOT NULL	Name of Actor		
a_age	int	NOT NULL	Age of Actor		

Genre					
Fleld Name	Data Type	Contraint	Description		
g_id	int	PRIMARY KEY	ID of Genre		
g_name	nvarchar (20)	NOT NULL	Name of Genre		

Director					
Fleld Name	Data Type	Contraint	Description		
d_id	int	PRIMARY KEY	ID of Director		
d_name	nvarchar (20)	NOT NULL	Name of Director		
d_age	int	NOT NULL	Age of Director		

Country							
Fleld Name Data Type Contraint Description							
country_id	int	PRIMARY KEY	ID of Country				
country_name	nvarchar (20)	NOT NULL	Name of Country				

FavoriteMovie							
Fleld Name Data Type Contraint Description							
c_id	int	PRIMARY KEY,	ID of Client				
	IIIL	FORGEIN KEY	ID OF CHEFT				
m_id	int	PRIMARY KEY,	ID of Movie				
	int	FORGEIN KEY	וט טו ואוטאופ				

ActorInMovie							
Fleld Name Data Type Contraint Description							
m_id	int	PRIMARY KEY,	ID of Movie				
		FORGEIN KEY	ib of Movie				
a_id	: m t	PRIMARY KEY,	ID of Actor				
	int	FORGEIN KEY	ID of Actor				

DirectorInMovie								
Fleld Name	Fleld Name Data Type Contraint Description							
m id	int	PRIMARY KEY,	ID of Movie					
m_id		FORGEIN KEY	וט טו ואוטאופ					
d_id	:	PRIMARY KEY,	ID of Divortor					
	int	FORGEIN KEY	ID of Director					

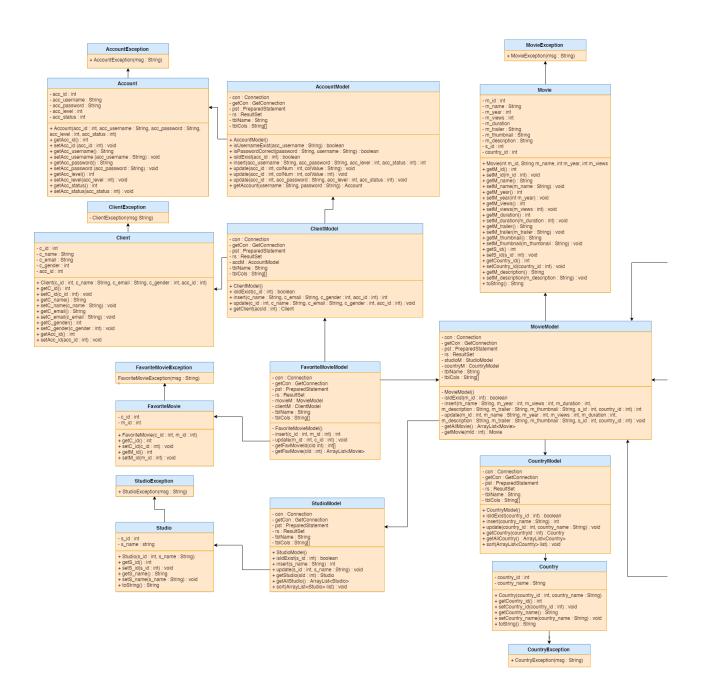

GenreInMovie							
Fleld Name Data Type Contraint Description							
m_id	int	PRIMARY KEY,	ID of Movie				
		FORGEIN KEY	וט טו ואוטאופ				
g_id	int	PRIMARY KEY,	ID of Genre				
	IIIL	FORGEIN KEY	ib of Genre

VII.Maintenance and Updating

Maintenance:

- Offical project will be stored mainly on our group's chat box on facebook
- We also back up our project to other cloud services like Google Drive,
 OneDrive every week.
- Functions that are under coding will be stored on group's members devices.

FIGURE 20 CLOUD SERVICES FOR BACKING UP

Updating:

- There are three kinds of update: Big ones, small ones and patches.
 - o Big updates: new function(s) or big changes in algorithms.
 - o Small ones: include UI update or patches.
 - o Patches: bugs fix.
- Our offical project will be updated whenever a new version released.
- New functions will only be added to main project when it's has been tested carefully by our group's testers.
- Changes also written in a log file so that members can track all the changes

VIII. Check List
